Dear Parkchester Residents,

We would like to congratulate you and your community for starting a Green Clothing Recycling Program. If you have any clothing, shoes, sneakers, or toys, that are either; dated, never worn, worn out, too big, too small, not paired, stained, torn, or damaged, please drop the off in the **green** clothing bins conveniently located at **various locations spread throughout Parkchester property**.

You are helping preserve our environment for the future generations as well as helping all those in need.

There are many benefits to this program, listed below are the top five:

1. Time – it takes less time to recycle old clothing than to manufacture new clothes. By spending less time on manufacturing, we have more time to dedicate to other important things, such as sustainability, environment and growth.
2. Energy – By using less energy on manufacturing, the energy consumed by us will become less expensive, cleaner and more readily available.
3. Money – The money saved through the reduced use of energy means more competitively priced goods for Americans and citizens of the rest of the world.
4. Charities - We work with various charities to help them pursue their missions. You too can have a chance to support noble charities that you respect and want to help without making a monetary donation. By simply giving what you no longer want or need, you are doing a charitable deed and feeling rewarded.
5. Lives – Believe it or not, there are millions of people in the USA and abroad that wouldn't have clothing if people like us did not recycle. Less than 10% of discarded clothing reaches those people that need it most. By participating in this green clothes recycling program, by simply giving what you no longer need or want, not only are you giving clothes a second chance, but you are also giving people everywhere in the world a chance at hope.

Join us on this worthwhile path to changing the world. We give clothes a second chance. Go Green with SpinGreen!!!
